Kaytex Fabrics' shares list 20 pc lower at Rs 144

Mumbai, Aug 5 (IANS) Kaytex Fabrics made a weak debut on the stock market on Tuesday, with its shares listing at Rs 144 on the NSE SME platform. This was 20 per cent lower than the IPO's upper price band of Rs 180. After listing, the stock continued to trade weak, moving between a high of Rs 151.20 and a low of Rs 136.80 during the day. The poor listing came as a surprise to many investors, especially since the Kaytex Fabrics IPO had received a strong response. Overall, the issue was subscribed 42.70 times, with retail investors bidding 47.85 times the allotted quota, qualified institutional buyers (QIBs) subscribing 31.16 times, and non-institutional investors (NIIs) subscribing 3.19 times. Market expectations had been higher ahead of the debut. The IPO's grey market premium (GMP) was at +15 — suggesting that shares could list around Rs 195 — about 8.33 per cent higher than the upper price band. However, the actual listing price was much lower, disappointing investors.

Even healthy processed food may not be good for your weight loss journey: Study

New Delhi, Aug 5 (IANS) Following a healthy diet to lose weight? Make sure it's minimally processed, suggests a study, which showed that reducing processing could help to sustain a healthy weight. In a first, researchers from the University College London (UCL) nutritionally matched minimally processed (MPF) and ultra-processed (UPF) diets. The results, published in the journal Nature Medicine, showed that participants lost twice as much weight eating minimally processed

foods compared to ultra-processed foods. "The primary outcome of the trial was to assess percentage changes in weight, and on both diets, we saw a significant reduction, but the effect was nearly double on the minimally processed diet," said Dr Samuel Dickson, first author of the study from the UCL Centre for Obesity Research. The trial split 55 adults into two

groups. One group started with an eight-week diet of MPF, such as overnight oats or homemade spaghetti Bolognese. After a four-week "washout" period during which participants went back to their normal diet, they switched to a diet of UPF, such as breakfast oat bars or a lasagne ready meal. The other group completed the diets in the opposite order. In total, 50 participants completed at least one diet.
